HANDGUN MICROMETER ADJUST SCREW

WARNING: This product may contain steel alloyed with trace amounts of lead and other elements which are known to the State of California to cause reproductive harm and cancer. For more information, go to www.P65Warnings.ca.gov. To prevent exposure, do not alter the product by welding, grinding, etc.

INSTRUCTIONS

Simply unscrew the adjusting screw, verify the bullet seating plug is installed. Then screw the Micrometer body into the bullet seating die finger tight.

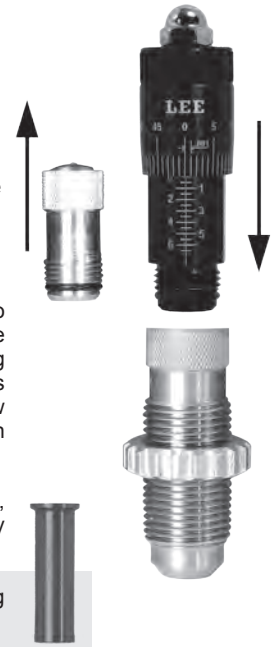

Rotate the thimble clockwise until the bullet is just seated in the case.

Measure your cartridge overall length.

Adjust the cartridge overall length to the desired length by turning the thimble in clockwise, remembering each line on the thimble represents .001". The Micrometer Adjust Screw reads exactly the same as a precision depth micrometer.

If you wish to duplicate a seating depth, record your measurement to easily return for future use.

Compatible with this style bullet seating plug.
